## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

1. figures 1-4
2. figures 5-7
3. figures 8A and 9
4. figures 8B-8G
5. figures 10-13
6. figures 14-16
7. figures 17-19
8. figures 20-21
9. figures 22-25
10. figures 26-33
11. figures 34-40
12. figures 41-46
13. figures 47-51
14. figures 52-55
15. figure 56
16. figure 57
17. figures 58-61
18. figure 62
19. figures 63-68
20. figures 69-70
21. figures 71-72
22. figures 73-74
23. figures 75-77

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

Art Unit: 3677

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

- Claims 1-15, 47, 50 are readable on species 1
- Claims 16-20, 23-27, 32-37 are readable on species 2
- Claim 21 is not readable on any of the disclosed species
- Claims 22, 28-30 are readable on species 7
- Claim 31 is readable on species 12
- Claims 38-43 are readable on species 11
- Claims 44-46, 51 are readable on species 13
- Claim 48 is readable on species 15
- Claim 49 is readable on species 21
- Claim 52 is readable on species 20

The following claim(s) are generic: none.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each grouping has its own special technical feature, for example species 1 is directed to a beam fastener using an SMA wire to disengage the fastener as compared to species 2, which is directed to a pin fastener and an SMA wire to disengage a circlip from a groove in the pin.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
